Construction and demobilisation update

Dear Resident,

Work is rapidly coming to a close on the \$3 billion NorthConnex project to build a nine kilometre tunnel linking the M1 Pacific Motorway to the Hills M2 Motorway.

Work to complete the project includes finalising landscaping, fencing and minor repairs across all locations. Commissioning activities will also continue across the alignment.

Activity to vacate temporary construction areas is underway at Eastbourne Avenue, Wahroonga, and along the M1 Pacific Motorway, while work at the tunnel support facilities at Wilson Road, Pennant Hills and Trelawney Street, Thornleigh is nearing an end.

Miscellaneous deliveries, survey, maintenance and inspection activities will continue.

How will the work affect you?

You will experience noise, light and increased vehicle movements during some of these activities. We will make every effort to minimise impacts by:

- > consulting with directly affected residents
- > using non-tonal reversing beepers on all machinery
- > turning off equipment and vehicles when not in use
- > using lighting towers only where necessary
- > scheduling noisier work for completion earlier in the evening where possible
- > avoiding shouting or unnecessary noise and using radio communication.

Work hours

7am to 6pm Monday to Friday,
8am to 1pm Saturdays

Note that certain activities are now permitted to occur on Saturdays, Sundays and public holidays without requirement to seek consent for Out of Hours Works.

For the safety of motorists and workers, work may occur outside of standard construction hours, in line with our environmental approvals.

Tunnel excavation, associated above ground activities and access to compounds is carried out **24 hours a day**.

BUILDING OUR FUTURE

Transurban

Traffic management

There will be intermittent lane closures on Pennant Hills Road and adjoining streets with local detours. Traffic management and signage will be in place to ensure the safety of motorists, residents and workers.

Please allow extra travel time and visit livetraffic.com, download Live Traffic App or call the Transport Management Centre 132 701 for the latest information.

Plant and equipment

The project team will use a large range of plant and equipment including heavy and light vehicles, concrete trucks, vacuum trucks, street sweepers, tipper trucks, line marking and removal plant, sweepers, concrete saws, bobcats, concrete breakers, lighting towers, asphalt pavers, grinders, water carts, rollers, cranes, excavators with and without hammer attachments, hammer drills, core drills, rattle guns, generators, knuckle boom lifts, elevated work platforms, pumps and vibrators, jackhammers, power tools and hand tools.

Yours sincerely,

NorthConnex Project Team
