

23 January 2015

Dear resident

Re: Utility location investigations

On 15 January the Federal Assistant Infrastructure Minister, Jamie Briggs, and NSW Roads Minister, Duncan Gay, announced planning approval and the start of construction work for NorthConnex. The conditions include new and extensive safeguards on the operation of the tunnel and air quality.

NorthConnex is a nine kilometre tunnel that will link the M1 Pacific Motorway at Wahroonga to the Hills M2 Motorway at West Pennant Hills, removing around 5,000 trucks off Pennant Hills Road.

To support the detailed design of the proposed motorway, investigations to locate utilities are required at a number of locations along the preferred project corridor from Pennant Hills to Wahroonga. Most locations are within the road corridor. Access to private property if required, will be negotiated in advance with property owners.

Investigations will include:

- Searching for locations of services; and
- Marking up locations in different colours.

During the investigation work some hand-held equipment will be used.

This work will start on 2 February 2015. Investigations at any one site may take around one day to complete.

Work will take place Monday to Friday between 7am and 6pm and Saturday between 8am and 1pm in residential areas. No work will take place on Sundays.

Minor disruption to access, on-street parking, and traffic in some locations may occur but will be managed safely and alternative road/property access will be provided if required.

If you have any questions about the investigations or the project or would like to register for project updates, please don't hesitate to call members of the project team on 1800 997 057, email <mailto:enquiries@northconnex.com.au> or visit the NorthConnex Community Information Centre at 354-356 Pennant Hills Road, Pennant Hills, open every Thursday from 9am to 4pm.

Yours sincerely

NorthConnex Project Team

Return 
**local streets to
local communities**

**Up to 5,000 trucks per day
off Pennant Hills Road and into tunnel**
