## Work to build permanent Motorway Control Centre – Southern Interchange Compound, West Pennant Hills

Dear resident,

Relocation of site offices and amenities from the northern end of the Southern Interchange (on the corner of Eaton Road and Pennant Hills Road) to above the detention basin has been completed. Work is now underway to prepare for construction of the permanent facilities, including the permanent Motorway Control Centre, ventilation facility and emergency response facility. The tower crane boom has been extended to carry out this work, which is expected to be completed by mid-2019, weather permitting. The main work activities include:

- > removing the existing water treatment plant and treated water storage tank
- > removing internal hoardings, concrete slabs and haul roads
- > relocating the tunnel site offices and amenities to above Pennant Hills Road northbound tunnel on ramp
- > building a retaining wall along the western boundary of the compound
- > building foundations for the ventilation facility

This will involve concreting, shotcreting, steel fixing, formwork, water management, ventilation and drainage works, service installation and relocation, signage installation, pavement work, installation of precast structures and deliveries.

Where possible, work will be carried out during standard construction hours **Monday to Friday 7am to 6pm and Saturdays 8am to 1pm**. To ensure the safety of workers, some work may be carried out at night and on weekends.

Plant and equipment for this work includes excavators with various attachments, surface miner, hand tools, power tools, trucks, concrete agitator trucks, concrete pumps, concrete vibrators and screeds, concrete saw, excavators, sucker trucks, sweeper truck, vacuum truck, lighting, light and heavy vehicles, paving machine, profiler, spray seal, core drill, line marking plant, line marking removal plant, bobcats, jackhammers, cranes and saw cutting machines.

You may experience some noise during this work and we will make every effort to minimise impacts by

- > using non-tonal reversing beepers on machinery
- > turning off equipment and vehicles when not in use
- > using solar-powered lighting towers where possible
- > using noise blankets where feasible
- > directing noise generating equipment away from residential properties where possible

Australian Government

**BUILDING OUR FUTURE**

**Transurban**

Fit out work in the main northbound tunnel portal is also underway and includes installation of services and cabling, tunnel paving and lining as well as mechanical and electrical equipment.

If you have any questions or complaints please contact us on 1800 997 057 (24 hours), [enquiries@northconnex.com.au](mailto:enquiries@northconnex.com.au) or visit the NorthConnex Community Information Centre at 118 Yarrara Road, Pennant Hills, open Monday to Wednesday , from 9am to 1pm.

Yours sincerely
