Ref: N0114

Dear Resident

Pennant Hills Road: installation of new traffic signals for access to the Southern Interchange Compound

Further to our notifications delivered in 2015, and January and April 2016 for the Southern Interchange Compound, new traffic signals will be installed and operating from **5am Friday 6 May 2016**. See overleaf for the location of the new signals.

The new signals will allow the majority of heavy vehicles to enter and exit the site directly from Pennant Hills Road, reducing truck movements on Eaton Road. Light vehicles will continue to access the site from Eaton Road.

The traffic signals will be synchronised to ensure traffic flow with the two sets of lights to the north and south of these signals.

What are we doing?

On Thursday 5 May, 2016 for one night, work will be undertaken to complete the installation of the signals including line marking, and testing and commissioning of the traffic signals.

To avoid disruption to traffic on Pennant Hills Road, work will be done at night between the hours of 9pm and 5am.

There will be intermittent lane closures as a part of this work and traffic management and signage will be in place to ensure the safety of motorists.

Plant and equipment for this work includes:

- Line marking machinery
- Traffic control trucks.

You may experience increased noise during some of these activities and we will make every effort to minimise impacts by:

- Turning off equipment and vehicles when not in use
- Where possible directing noise generating equipment away from residential properties.

We apologise for any inconvenience this may cause and we thank you for your patience. If you have any questions, comments or complaints, please do not hesitate to call us on **1800 997 057**, email enquiries@northconnex.com.au or visit the NorthConnex Community Information Centre at 118 Yarrara Road, Pennant Hills, open weekdays from 9am to 5pm.

Yours sincerely,

NorthConnex Project Team
